Item 7600 - 7660

Supply voltage	230	V
Mains frequency	50 / 60	Hz
Mains protection (delayed)	16	A
Nominal power 50% ED	0,8	kVA
Maximum welding power	6	kVA
Maximum secondary voltage	2,25	kA
No load secondary voltage	3	V
*Weld time	*65	cycles
Protection rating	21	IP
Weight	6	kg
* Only on version item 7660		

Spotter 3464

Multifunction portable spotter 2500A. Extremely versatile equipment for the repairs in car body shops. The welding systems with built-in transformers are supplied complete with: micro-processor digital welding control unit with time adjustment in cycles (from 0,5 to 99) and welding current adjustment. The welding system is equipped with Auto-start mode which can be either enabled or disabled.

Supplied with a multifunction gun with 2000 mm cable and a 2000 mm long earth cable. The mains cable is 4 m long.

Standard equipment: Percussion extractor, kit of accessories and consumable material for straightening works in car-body shop. It is possible to perform shrinking with the carbon electrode. A quick straightening of panels is carried out thanks to the 3-point star on the percussion extractor. Improved versatility to allow the use of different accessories for sheet straightening.
